Work Experience

Tata Consultancy Services – Pune, MH   **Sep 2021- Present**

React Front End Developer at Jaguar & Landrover (Client)

- Built responsive React components using semantic HTML5, JavaScript, JSX, and CSS to create user-friendly interfaces.
- Developed interactive charts with React chart libraries to analyze user engagement on the Stack Overflow platform.
- Integrated API data into Google Cloud Platform (GCP) storage, enhancing data management and accessibility.
- Retrieved and utilized API data from Swagger to improve application functionality and streamline development.
- Contributed to increasing user engagement on the JLR Stack Overflow site through targeted feature improvements and optimizations.
- Created and optimized React components based on client specifications, ensuring alignment with project requirements and objectives.
- Collaborated directly with clients to implement changes and meet specific project needs.
- Worked closely with cross-functional teams to gather data via Python scripts, driving improvements in user engagement on Stack Overflow.
- Performed comprehensive web application testing and troubleshooting to identify and resolve issues, ensuring smooth performance and enhancing the overall user experience.

Application Analyst (Product Development)

- Installed and managed licenses for Product Engineering applications on license servers.
- Granted access to CAE users on HPC Isilon (UNIX) server.
- Created installation package requests for Product Engineering applications.
- Developed UNIX shell scripts to optimize space on the production license server.
- Collaborated with clients and vendors to migrate the AVL CRETA application to the latest version and new application servers.

Magneto IT Solutions – Pune, MH   **Feb 2021-May 2021**

Backend Developer (Intern)

- Completed an internship focused on the Magento framework for developing E-Commerce websites.
- Developed backend solutions using PHP, MySQL, and Linux within the Magento environment.
- Contributed to the design and implementation of specific features and functionalities.
- Gained hands-on experience in backend development and database management.
